Hi all,

I am working on creating automatic mixing systems. To evaluate the mixing results, I am running a listening study! The study goal is to understand whether the output of our automatic mixing systems is perceptually close to the mixes by human mixing engineers.

I would appreciate your participation at: [link]. The survey should not take more than 20-30 minutes of your time. For the best audio experience, I recommend using Google Chrome. You are eligible to take part if you are over the age of 18 in the United States.

Please contact Kelian (Mike) Li <kli421@gatech.edu> with any questions that you have about the survey!

Thanks for your time!
