Dear ISMIR community,

We are working on creating automatic mixing systems. To evaluate the mixing results, we are running a listening study! Our study goal is to understand whether the output of our automatic mixing systems is perceptually close to the mixes by human mixing engineers.

We would appreciate your participation at: [link]. The survey should not take more than 20-30 minutes of your time. For the best audio experience, we recommend using Google Chrome. You are eligible to take part if you are over the age of 18 in the United States.

Please contact Kelian (Mike) Li <kli421@gatech.edu> with any questions that you have about the survey!

Thanks for your time!
